

OPEN ATLAS 2026

Translate experience. Preserve truth.

“Réunia Career Bridge helps immigrants and newcomers translate their international experience into applications that U.S. employers can understand and evaluate — without inventing qualifications.”

Career translation

Clarifies international titles, credentials, and accomplishments while preserving the original facts.

Verified evidence

Carries candidate-confirmed evidence across jobs, resumes, interviews, and next actions.

One connected journey

Links application requirements, resume decisions, practice, scorecards, and outcomes.

THE PROBLEM

Strong experience is often lost in translation

Candidates face terminology, evidence, and interview conventions that differ across labor markets.

Information loss

An unfamiliar title or credential may be underestimated even when the underlying work is highly relevant.

Unsafe optimization

Many tools improve wording without preserving traceability, creating pressure to overstate qualifications.

Disconnected tools

Resume writing, job search, interview practice, and follow-up often live in separate systems.

Career Bridge response

Translate

Explain target-market meaning without changing the fact.

Verify

Store source-backed or candidate-confirmed evidence.

Reuse

Apply the same confirmed evidence across applications.

Act

Turn gaps, dates, and interview findings into next steps.

HOW IT WORKS

Evidence follows the candidate through every stage

AI can improve communication, but it cannot invent experience.

- 1

Profile & baseline

Target role, market, languages, credentials, and source resume.
- 2

Translate & confirm

Review uncertain terminology and save reusable evidence.
- 3

Apply & tailor

Match job requirements and select the strongest supported resume content.
- 4

Prepare & practice

Generate role-specific preparation and adaptive interview follow-ups.
- 5

Review & act

Score answers, improve them with confirmed facts, and create next actions.

Evidence boundary

Unsupported claims are removed or flagged. Candidate confirmation is required before uncertain interpretations shape application wording.

WHY IT MATTERS

A feasible product with measurable social value

Designed for a real deployment, not only a prompt demonstration.
